**Abstract:** In this article, children's interest in books in the family, formation of reading culture 5 important initiatives in the development of our provide information about "*organization of systematic work on raising the spirituality of young people, widely promoting reading among them*".

**Key words:** family environment, culture of reading, moral maturity, family values.

*In order to survive in the world, secular science and knowledge are necessary, and a nation without modern science and science will be inferior to others.*

*Makhmudkhuja Bekhbudiy*

A book is an unquenchable light that illuminates the paths of life, a source of happiness that gives meaning to a person's life, it is a friend to accompany him in any situation. There is no tool as powerful as a book to ensure the spiritual maturity of a person. That is why, from time immemorial, enlightened leaders and wise men have called all mankind to read books and learn the secrets of science and manners from them.

In fact, the book is a great force that elevates a person and increases his spiritual strength. It is a torch capable of strengthening the historical memory, spiritual-enlightenment world, and scientific ground of mankind, and is capable of shining a bright light on the future.

Muhammad Jabalrudi, who created great works on ethics, says about the book: "Oh dear! There is no dearer and more pleasant interlocutor for a person than a book.

The book has no equal in eloquence, maturity, grace, and is a companion free from hypocrisy. In times of loneliness and sadness, munis is a blessing. There is no discord or grudge in it. He is so sympathetic that there are no lies or mistakes in his words. A conversation is not enough for a person. He does not hurt his friend's tongue. And he does not squeeze his heart. She is such a wife that no one gossips behind her back. There are benefits from his conversation that you cannot find from people. On the contrary, a person is harmed by the conversation of many people. A friend like a book contains all the knowledge that keeps people aware of the past and the future.

*If there is a study rule, there will be greatness,  
If knowledge is the rule, there will be greatness.*

*Yusuf Khos Khojib*

If we look at the history of the development and progress of the society, the nation, the role of educated, spiritual and enlightened youth in the development of the society is incomparable. Books are considered to be one of the main factors that educate such young people - a means of reading. The book is the most unique discovery created by mankind, which lifts us from the earth to the sky, leads us to perfection, brings light and warmth to the hearts of people, helps us to consciously understand the difference between white and black, good and evil, destruction and creativity. . The book glorifies man.

In the process of wide introduction of reading in practice, we can first of all reconstruct the existing libraries, update their material and technical base, provide them with the necessary scientific and fiction literature, widely introduce and effectively use modern innovative technologies in the activities of libraries. Necessary measures for the implementation of these works have been determined and their implementation is being regularly monitored. As a clear proof of this, the 5 important initiatives in the development of our country, "*Raising the spirituality of young people, organizing systematic work on promoting reading among them*" is a clear example of our opinion.

*Where action is weak, strong  
knowledge is useless.  
Knowledge without action is an  
arrow without a string.  
Az-Zamakhshariy*

If the parents in the family love books, the child raised in such a family will also be familiar with books, such children will have a wide worldview, a wide range of thinking, polite, kind, try to do good to others as much as possible, every word they say as they grow up to be an intelligent child who thinks about what he is doing, in a word, tries to show the qualities of a perfect personality.

The systematic conduct of reading in a family environment increases the effectiveness of the expected result. Telling children about Uzbek folk tales from a young age inculcates human qualities such as diligence, sincerity, hospitality, and concepts such as respect and reverence for national and universal values. In addition, we will introduce our great thinkers such as Yusuf Khos Hajib, Jalaluddin Rumi, Alisher Navoi, Farabi, Abdullah Avloni, Niyazi, and their educational ideas serve as the main source in child education.

- *Based on the above, we can recommend the following to parents:*
- *Be an example to make the child interested in books;*
- *Read examples from the book you read or tell a story;*
- *Create a family library, create a separate section for the child;*
- *Let your selected books meet the pedagogical and psychological requirements.*

*Occasionally take children to the library and bookstore;  
There is only one good - knowledge and only one bad - ignorance.*

**Socrates**

He results of the research conducted by the American scientist and writer Neil Gaiman showed that children who do not read books have a high probability of becoming bullies in the future. At the same time, reading books encourages people to empathize - to stop thinking only about their own

desires and interests, and unite towards a common goal.

In short, this book is the basis of all good works and creative ideas. It is also a book that shines the light of knowledge on us. That's why today, if we start the interest in books from the family and for this, if we form libraries suitable for their age, it will be an excellent light upon light.
